The CPA request and IDS received 8/30/2002 have been entered and consequently the amendment of 6/3/2002 has now been entered. Claims 1, 6-11, 16-27 are currently pending in this application.

5

The rejection of record of claims 1, 6-11, 16-23 under 35 USC 102(e) over Smith is maintained. The rejection of record of claims 24-27 under 35 USC 103(a) over Smith is maintained.

10

Applicant's arguments filed 6/3/2002 have been fully considered but they are not persuasive.

15

Applicants argue that the claimed stability is not inherent or obvious in view of the teachings of Smith. A declaration is provided by one of the inventors, Guo, stating that polysulfone matrix is not storage stable and that nylon matrix is storage stable. Further, Smith does not teach a kit.

20

It is the examiner's position that all the components of the composition and structural features presently claimed are taught by Smith for the same function. The storage stability would therefor be inherent in the composition. Polyamide is clearly taught by Smith as a matrix for the same function as presently claimed.

Regarding the presently claimed kit directed to a test strip, a lance and a standard, no novelty is seen in such a kit.

-3-

Claims 1, 6-11, 16-27 are rejected under 35 U.S.C. § 112,
second paragraph, as being indefinite for failing to particularly
point out and distinctly claim the subject matter which applicant
regards as the invention. Each of the following applies in all
5 occurrences.

In claim 1 and all occurrences, Nylon is a trademarked name
which is improper in claims and should be capitalized. In claim
6 ~~system~~ is not understood in context; does it refer to an
apparatus or composition? No system is seen. In claim 8
10 ~~analyte~~ is confusing because no analyte is seen.
